

ESTEQ expands to the CAPE!

Due to various requests and market growth in the Western Cape, ESTEQ expanded to the Cape area by opening an office in Belville. This will enable us to serve both the Western and Eastern Cape better and assist your company to use our “Engineering Technology for Better Business”.

On 17 April the ESTEQ Cape Office was launched. More than 50 people attended the launch and enjoyed a fingerlunch with wine and other beverages to celebrate the new office. Cobus Oosthuizen, CEO of ESTEQ: “We are very happy to receive such a warm welcome by the Western Cape.”

A lucky draw took place and 4 attendees won prizes. Theodore Turner of Theebo Tech and Thomas Stevens from Optimal Energy each won an ESTEQ sport bag, Tracey-Lee Gosling from Cape Fabricated Metals walked away with the Space Explorer USB and Gideon Joubert of Windmeul Engineering won the \$5000 Siemens PLM Software voucher!
